

Get more out of appRELAY with appRELAYSM Test Center.

You've already used our testing services to verify your application's compliance with certification programs and to ramp-up your resources during peak projects. What you didn't know is that now you can use our tools to manage your in-house QA department!

Introducing appRELAYSM Test Center – a global QA management tool with special features for the mobile industry.

appRELAYSM Test Center integrates QA resources – test personnel, handset inventory, multiple locations, software builds, test plans – in a single, browser-based management tool.

Move your QA tasks and resources among locations with a few clicks.

appRELAYSM Test Center is based on the same tool that manages all major mobile certification programs for thousands of applications, developers, manufacturers and sponsors worldwide.

Instead of waiting days or weeks to find out whether you need more resources, you can see a real-time snapshot of your global testing efforts: internal, offshore or outsourced. With a few clicks of the mouse, you can add or remove testers and move tasks among resources anywhere in the world.

Key Features and Benefits

- Lower QA costs, greater efficiency, shorter time-to-market
- Globally centralised test management
- Control of criteria, results, defects, devices, testers, turn-around time
- Customised testing reports
- Sharing of resources with testing partners
- Organization by test projects
- Integration to bug tracking systems
- Workforce optimization
- Collaboration and communication among multiple stakeholders
